

“Be inventive. When details are unusual, even subtly unusual, that’s exciting.”

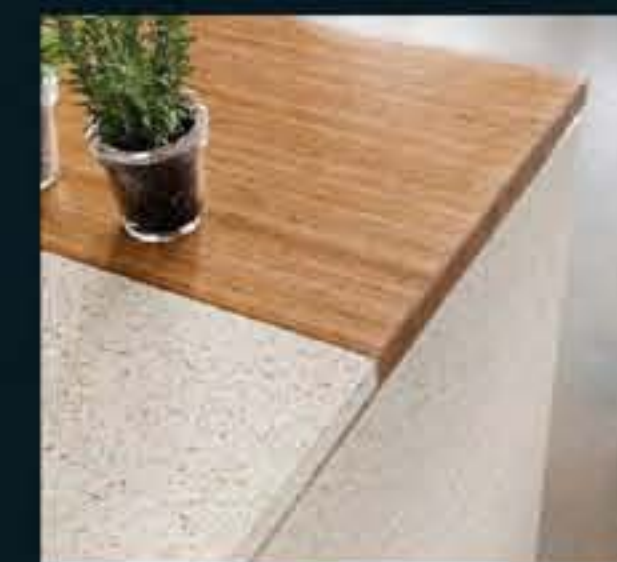

“The kitchen is a part of the décor of the overall home now. The details, the choices you make for it tell the story of what you love. Get excited about materials, and blend them in interesting ways. Consider open shelving, not just for pots and plates but for pottery and other statement pieces. Bring in artwork. Embrace clean lines, but make it dramatic. Details can be simple but sophisticated and surprising, too.”
