

Kitchen by award-winning designer Matthew Patrick Smyth. Design pieces from his personal collection.

☑ WHAT WILL A **DETAIL** SPARK?

It could be anything. An idea. A feeling. A world of possibility. It's what you'll discover with the new Jenn-Air® gas cooktop. It offers powerful heat and refined control, with an 18,000 BTU burner that goes as low as 2,200 BTUs. And its simmer burner gives you an even more delicate flame. Sleekly redesigned, its details can take a kitchen—or an evening—somewhere entirely new.
